Transformation in fragile contexts: experiences from SIPRI in the climate, food security and peace field

Dr Caroline Delgado

28 Sept. 2023

sipri

Food insecurity, violent conflict and climate change on the rise

Evolution of global mean surface temperature

Source: IPCC- Evolution of global mean surface temperature (GMST) over the period of instrumental observations

Mutually reinforcing negative feedback loops between climate- and environment-related stress, food insecurity and conflict

Evolving social, political, economic context

Aligning policies for mutually reinforcing positive feedback loops between climate, food security and peace

What is needed: opportunities, obstacles and trade offs

- Systems thinking
- Integrative approaches
- Partnerships

Food for Thought

What internal changes within GIZ are needed to:

- incentivise synergy building
- enhance strategic aligning
- integrate a peace lens
