

Salary Band 4	Senior Technical Advisor: Energy to National Treasury under the South African – German Energy Programme (SAGEN)
Reports to:	Programme Manager - SAGEN
Duration:	Until 31 December 2024

1. BACKGROUND

Change is accelerating within power systems across the world. The main factors driving this transformation include the economic and political drive towards low-cost clean energy solutions, the acceleration of decentralised power generation technologies, increased digitalisation, and energy efficiency reaching across entire power systems. These changes are resulting in a structural shift in the way power systems and markets are set up and operated.

The **South African-German Energy Programme (SAGEN)** collaborate with South African partners to manage the energy transition with a focus on renewable energy and energy efficiency. SAGEN is funded by the German government and implemented by the **Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ)** in cooperation with the **Department of Mineral Resources and Energy (DMRE)**, **Eskom** and the **South African Local Government Association (SALGA)** under the government-to-government coordination of **National Treasury (NT)**.

SAGEN's support includes the following fields of activity towards the transformation of the South African energy sector:

- Electricity Sector Policy and Regulation and Power Sector Reform.
- Capacity Building and Technology Innovation.
- Power System Planning and Operation.
- Embedded Generation in Distribution Networks.
- Municipal Energy Management.

A. ABOUT THE POSITION

SAGEN is looking to fill a Senior Technical Advisor: Energy position to be seconded to the National Treasury Cities Support Programme (NT CSP) to inter alia manage and implement energy related projects and activities in particular related to sustainable municipal energy businesses.

The successful candidate will join the NT CSP team as secondee of GIZ SAGEN in the National Treasury's Pretoria office combine excellent interpersonal skills and technical (including regulatory) know-how with a strong track record of project management in a fast-paced and results-orientated environment, partner-focused environment:

- assist National Treasury to support the transition to sustainability within the metro and broader electricity distribution sector;
- be responsible for providing technical assistance and for implementation of the projects in the energy workstream under the NT CSP's Climate and Sustainability Component;
- ensure the successful completion and project management of existing NT CSP projects, the conceptual design and implementation of new projects and a broad range of strategic support to NT CSP related to the energy sector; and
- manage and maintain the relationship and partnership between NT CSP and GIZ SAGEN and actively linking the SAGEN programme to the needs of the relevant units in National Treasury.

B. RESPONSIBILITIES AND TASKS

The Senior Technical Advisor: Energy is required to undertake and be responsible for inter alia the following tasks:

- Lead and manage the sustainable municipal energy projects in the National Treasury Cities Support Programme.
- Support intergovernmental coordination to address policy issues, including electricity sector regulatory reform and affecting sustainable energy at an electricity distribution level (metros). This includes supporting coordination, engagement and input, within National Treasury, with other government departments and key stakeholders, with external programmes and initiatives in support of power sector reform and a sustainable energy transition.
- Facilitate and assist in the coordination and where necessary strengthening of metro input in national policy processes, convening meetings and building on/complementing existing platforms and fora in the municipal energy sector.
- Provide and manage the delivery of technical assistance at city level, in response to metro requests, including on new industry business models in the metro energy sector, on city renewable energy capital projects, and other city initiatives in support of a managed transition to diversified energy sources within a transitioning energy sector.
- Coordinate and facilitate alignment and collaboration on revenue management towards enabling more resilient metros including by providing and managing the delivery of technical assistance on the application of cost of supply studies to inform cost-reflective tariffs, with quality assurance, direction and oversight from relevant units within National Treasury.

- Conceptualising and drafting papers, notes, memos, presentations and other relevant documentation and information regarding the sustainability of municipalities.
- Proactively and independently identify strategic support and interventions required by National Treasury and facilitating the implementation of such support and interventions.
- Play an active link and balance the different objectives and outputs of both the GIZ SAGEN programme and National Treasury whilst cooperating with each organisation and successfully implementing various energy projects.
- Plan, implement and coordinate activities with other projects and diverse institutions and actively identify interfaces and synergies.
- Coordinate, align with and manage other potential partner initiatives to enhance alignment e.g. IFC, ICLEI, DBSA.

C. REQUIRED QUALIFICATIONS, COMPETENCIES AND EXPERIENCE

Qualifications

- University degree in law, economics, political science, public policy and management, or similar, with a focus on sustainable energy.

Competencies and Professional Experience

- Qualification should be enhanced with at least 10 years' relevant work experience in the field of sustainable energy policy and policy implementation, ideally in the work environment of national and/or local government.
- Experience and track record in effective senior stakeholder engagement and management including working with government regulatory bodies including Energy and Finance Ministries, Regulators, Energy Agencies, NGOs, Consulting firms, etc.
- Demonstrable ability and skill to work in partnership with a range of stakeholders and on different levels, including government, private sector and non-profit and experience in the conceptualisation and management of partner and results oriented consulting assignments.
- Specialised knowledge and experience, of relevant national policies (economic, energy and local government), legal and regulatory frameworks and fiscal mechanisms relevant to renewable energy including applicability to municipalities.
- High level of flexibility and ability to engage proactively, time efficiently and competently in new and varying assignments, as well as strong interpersonal skills.
- Demonstrated success in project management and coordination skills.
- Excellent networks and relationships with stakeholders involved in sustainable energy.
- Management skills in leading international teams of energy experts and expert consulting services.

- Ability to work as part of a team and independently in a structured, methodical manner.
- Proven ability to work in a multi-disciplinary, diverse, and complex environment.
- Extensive technical know-how and proven willingness to further develop and enhance technical skills and competencies.
- Excellent writing, verbal and presentation skills (fluency in English) and the ability to clearly communicate complex policy issues to both technical and non-technical audiences.
- Relevant computer skills (Microsoft Office, Microsoft Teams, Outlook, etc.).

D. ADDITIONAL INFORMATION

- This position is based at National Treasury in **Pretoria**.
