**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Opening Remarks

H.E. General (Ret) Luhut Binsar Pandjaitan, MPA
Coordinating Minister for Maritime Affairs and Investment

This global partnership between Indonesia and Germany is a clear testimony of high level of trust, confidence, reliability, and ambitions in the bilateral relation. My coordinating ministry will guarantee an efficient and result-oriented management of the Green Infrastructure Initiative, both in relation to the coordination between national institutions as well as in relation to the involved provinces, regencies, and cities. I will be teaming up with my colleague Bappenas-Minister Suharso, to ensure a very strong cooperation from the Indonesian side in all steps of the way. In my function as Coordinating Minister I can confirm that this Initiative will achieve its goals: improved environment, reduced emissions, and better services. In sum, it will be an excellent investment for the German government in our bilateral partnership.

His Excellency Minister Müller of BMZ,
His Excellency Minister Suharso of BAPPENAS,
Excellencies, Ambassador Havas in Berlin,
Ambassador Schoof in Jakarta, Governor Ridwan
Kamil of West Java, Governor Ganjar Pranowo
of Central Java, Governor Khofifah Indar
Parawansa of East Java, and Governor Wayan
Koster of Bali, Members of the Steering Committee,
Distinguished Guests, Ladies and Gentlemen.

It is a great pleasure to welcome you all to this
Kick-Off of the Green Infrastructure Initiative.

I have been very interested in this Initiative ever
since I heard about the agreement in the Bilateral
Government Negotiation in October 2019 and I
am very glad that our Coordinating Ministry will
be the Indonesian gatekeeper for this ambitious
endeavour.

Six months ago during the Virtual Roundtable
Discussion between Jakarta and Berlin, we
discussed Financing for Indonesia-Germany
Development Cooperation. Green Infrastructure
Initiative was a major discussion topic at that time.
And today we are witnessing that this Initiative is
coming into reality.

This global partnership between Indonesia and
Germany is a clear testimony of high level of
trust, confidence, reliability, and ambitions in the
bilateral relations. As members of G20, we share
the same goals of sustainable socio-economic
development for our populations while protecting
the global goods.

As we share responsibilities for achieving SDGs,
this Initiative is our joint response to the serious
issue of climate change. Through this Initiative,
we are matching the challenges of growing cities,

Opening Remarks

environmental problems and impacts of climate change with the desire of the citizens for better public services.

My Coordinating Ministry will guarantee an efficient and result-oriented management of the Green Infrastructure Initiative, both in relation to the coordination between national institutions as well as in relation to the involved provinces, regencies and cities. I will be teaming up with my colleague Bappenas-Minister Suharso, to ensure a very strong cooperation from the Indonesian side in all steps of the way.

Dear Minister Müller, Excellencies, Ladies and Gentlemen,

In my function as Coordinating Minister I can confirm that this Initiative will achieve its goals: improved environment, reduced emissions, and better services. In sum, it will be an excellent investment for the German government in our bilateral partnership.

Together, we are looking forward to seeing cleaner rivers, less marine litter, no more wild garbage dumps and fume-spilling buses, but rather state-of-the-art water management, circular economies, and emission-free public transportation.

I am very happy to co-chair this session together with Minister Müller. The agenda of the meeting has been distributed. I would like to remind everyone that we have many speakers but only 45 minutes in total. Without further ado, let us proceed. Thank you.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Opening Remarks

H.E. Dr. Gerd Müller

Federal Minister for Economic Cooperation and Development

The steering committee starts a new chapter in our success story. It started in 2019, when we committed ourselves to the initiative in the government negotiations. Change always needs a structure. The green change, that we want, needs green infrastructure. We pledge to provide loans for up to 2.5 billion Euros with you together.

Let us work together closely and act quickly. Let us protect the global climate together!

Your excellences Minister Luhut and Minister Suharso. Greetings from Berlin, Germany to you in Indonesia.

We are more than 10.000 kilometres away and the technology enables us to greet each other. This is a great miracle. I remember I visited your wonderful country in 2017. Minister Luhut, it would have been great to meet in person for this first session. But our virtual meeting still fills me with joy and optimism.

This steering committee starts a new chapter in our success story. It started in 2019, when we committed ourselves to the initiative in the government negotiations. Change always needs a structure. The green change that we want needs green infrastructure. Therefore we use blending to provide up to 2.5 billion Euros in loans to build this infrastructure together with you. In Indonesia, just like everywhere else, it is vital to take action before we find more and more plastic waste in our oceans. That is the first initiative in three sectors. Together we are working on your ambitious “National Waste Management Strategy” to reduce maritime plastic waste by 70 percent in 2025.

The second initiative is Water and Sanitation. In Indonesia, 80 percent of untreated wastewater goes to rivers and oceans. We want to assist you to treat the wastewater and improve the water supply. Better sanitation for the people. Our first project is in Central Java. There are more than 400.000 people who will enjoy the improved water supply from a total investment of 85 Mio. Euros.

Third, the sector of Transportation. We are in need of climate-neutral and efficient public transportation. The goals are to improve the air quality and to reduce the carbon emissions. Jakarta is the winner of the 2021 Sustainable Transport Award in the category of Integrated Local Public Transportation. I would like to congratulate you.

Ladies and gentlemen, guests and excellences.

We have known for a long time that the Green Infrastructure protects the climate. We all contribute to climate change and suffer under it. There is hardly any other country that is as affected by climate change as Indonesia. With its 17.000 islands, that is unbelievable for us Germans. Rising sea levels and heat waves are threatening habitats, homes, and livelihoods.

Opening Remarks

Indonesia plays a key role in the world. It has 93 Mio. hectares of forest. This is crucial for the global climate. Three years ago, I have visited some parts of this wonderful area. We have been working together in the forest protection for a long time. This topic is very important for all of us worldwide.

Let us work together closely and act quickly. Let us protect the global climate together! Let us also protect our health! The Covid-19 crisis is a wake-up call around the world. Our approach is One Health. This is a big challenge to fight against the Covid-19 pandemic worldwide. It is great to know that your foreign minister Ms Marsudi is

one of the three co-chairs of the GAVI/COVAX advanced market commitment. We are ready to help your government through another loan of 200 Mio. Euro in 2021. Because either we beat Covid-19 worldwide, or not at all.

Indonesia is a very strong partner for solving global problems. I hope that we will be able to sign our MoU soon, and I would like to visit Indonesia on this occasion. Thank you very much for your committed work and for your close and our close cooperation together. I hope to see you soon. Thank you so much for this morning in Berlin and afternoon in Jakarta.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Opening Remarks

H.E. Dr. (H.C.) Ir. H. Suharso Monoarfa
Minister of National Development Planning (BAPPENAS)

We need to explore the potential and facilitate modalities of projects other than G2G scheme. The Steering Committee is an appropriate forum to encourage and prompt such initiative. We are convinced that the strategic partnership of the Green Infrastructure Initiative can be a model of efficient and effective collaboration between all stakeholders for sustainable and climate-friendly development including smart combination of technical and financial cooperation between Indonesia and Germany.

Dear Excellency Minister Luhut - my senior,
Dear Excellency Minister Müller,
And all of the Governors who are attending this meeting this afternoon and of course this is still morning in Germany,
Excellency Ambassador Havas Oegroseno, and also Bapak Ngurah Swajaya, and Bapak Luky Alfirman, Excellency Ambassador Peter Schoof in Jakarta, All Participants, Excellencies, Distinguished Guests, Ladies and Gentlemen.

As all of us are aware that the establishment of this Steering Committee is, among others, triggered by, or as a follow up of, the financing commitment of the German government namely the Green Infrastructure Initiative, amounting to 2.5 billion Euros. The commitment was delivered to the Government of Indonesia at the margin of the World Bank Annual Meeting in October 2018 in Bali and was reiterated at the negotiation of the bilateral development cooperation in Berlin in October 2019. Considering that, we are in view that the focus of this Steering Committee is to put effort into utilizing the financing facility of Green Infrastructure Initiative.

It is our understanding that initially this financing facility commitment is addressed to support Government to Government projects. We have identified potential Government to Government

projects for the upcoming five years as listed in the Blue Book of 2020-2024. So far, the potential is 480 million Euros. In addition to that, the potential government program loan for the next five years is around one billion Euros. Therefore, we have a big space for utilizing the facility – it is around one billion Euros. Having said that, we need to explore the potential and facilitate modalities of projects other than Government to Government scheme. The Steering Committee is an appropriate forum to encourage and prompt such initiative.

We are now preparing a Memorandum of Understanding (MoU) on Green Infrastructure Development and Investment. This MoU is intended to formalize the commitment of the Green Infrastructure Initiative. This draft MoU covers, among others, areas of cooperation, financing modalities and schemes, as well as coordination mechanism including this steering committee. This proposed MoU has been officially conveyed by our Minister of Foreign Affairs for further negotiation and conclusion.

We are convinced that the strategic partnership of the Green Infrastructure Initiative can be a model of efficient and effective collaboration between all stakeholders for sustainable and climate-friendly development including smart combination of technical and financial cooperation between Indonesia and Germany. Thank you.

And today I am happy to announce that we are ready to officially launch the Green Infrastructure Initiative.

First of all, I would like to introduce the members of the Steering Committee.

As this is a bilateral Steering Committee, it consists of representatives from both countries.

Indonesia is represented by the Coordinating Ministry for Maritime Affairs and Investment, the Ministry of National Development Planning and the Ministry of Finance. There are three deputies from the Coordinating Ministry of Maritime Affairs and Investment who are involved, the Deputy for Infrastructure **1**, the Deputy for Investment and Energy, and myself as the Deputy

for Environment and Forestry Management **2**. Bappenas is represented by the Deputy for Infrastructure **3** and the Deputy for Development Funding **4**. The Ministry of Finance is represented by the Director General of Debt and Risk Management **5**.

And now the German side is represented by BMZ, KfW, and GIZ. BMZ is represented by the BMZ Director General Prof Claudia Warning **6**. KfW is represented by the KfW Director Office in Jakarta **7** and the Principal Project Manager **8**. And GIZ is represented by the GIZ Country Director **9** and the Principal Advisor **10**.

For that I would like to hand this over back to the MC. Thank you.

Federal Ministry for Economic Cooperation and Development

Excellencies, Ladies and Gentlemen:
Now let us move on to the next
item in our Agenda, Item number 3:
Adoption of Resolutions.

Resolution#1 BASIC REGULATION

Chair	Coordinating Ministry of Maritime Affairs and Investment (CMMAI)
Co-Chair	Federal Ministry for Economic Cooperation and Development (BMZ)
Permanent Members / Participants	<ul style="list-style-type: none"> • Ministry of National Development Planning (Bappenas) • Ministry of Finance (MoF) • KfW • GIZ

Role and Functions	<ul style="list-style-type: none"> • Update and exchange on the progress of the Indonesian – German Green Infrastructure Initiative Project on the basis of the Plan of Operation • Joint decision making on key strategic issues • Joint identification of solutions to solve challenges
Meetings	Twice a year
Source of Verification	Results Based Monitoring System Plan of Operation
Minutes of Meetings	By CMMAI and agreed by all permanent members

Dear Members of the Steering Committee, as you can see here, these very concise regulations define the membership to the Steering Committee – us – and the main purpose is:

- to inform each other twice a year about progress regarding the projects,
- to share challenges in the implementation, and
- to jointly agree on the necessary steps to take on the way forward.

The next resolution is on the selection criteria of the provinces.

Resolution#2 SELECTION CRITERIA OF PROVINCES

Criteria	Source of Verification
Political Commitment & Leadership	<ul style="list-style-type: none"> • Five-Year Medium-Term Development Plan on provincial level (RPJMPD) • Relevant subnational policies and regulations • Number of relevant project ideas, concepts and pre-studies submitted to CMAI and/or Bappenas' Blue-/Green Book process.
Already existing infrastructure projects in the eligible sectors	Information provided by provincial governments
Fiscal capacity	Past & existing loans, internal & external resources, level of fiscal transfers from national government, APBD
Proposed provinces by CMAI and Bappenas	CMAI
Level of interest to participate in the Green Infrastructure Initiative	Provincial Government

Dear Members, our ministry CMAI, in consultation with the key stakeholders, has prepared a list of general criteria for the selection of the first group of partner provinces for the Green Infrastructure Initiative.

I say the first group of provinces because there might be a scenario in the future in which we want to invite other regions to join the Initiative at a later stage.

As you can see, these criteria are of a rather strategic character, as we consider them important conditions for an enabling environment for our Initiative – strong political commitment for green infrastructure development, high level of ownership, close cooperation with the involved line ministries and a strong engagement by the provincial and local governments.

So for the next two resolutions I would like to give the opportunity to the Deputy of Infrastructure and Transportation to explain. Please, Mr Ayodhia:

Resolution#3 SELECTION OF PROVINCES

West Java	Central Java	East Java	Bali

Thank you, Ibu Nani.

Excellencies Ministers and Ambassadors, Honourable Governors, Distinguished Participants, Ladies and Gentlemen.

There are four selected provinces that have met our selection criteria, which are: West Java, Central Java, East Java and Bali!

Congratulations to all! We are looking forward to working together with the related stakeholders to achieve the goals of our Indonesian-German Green Infrastructure Initiative. And I would like to invite Prof Claudia to share her view regarding the proposed selection of provinces.

Dear Governors, also on behalf of BMZ and the German organizations I would like to warmly welcome you all to the Indonesian – German Green Infrastructure Initiative, I am looking forward to our joint collaboration!

Resolution#4 SELECTION CRITERIA FOR PROJECTS

<p>1. Sector relevance Three eligible sectors:</p> <ul style="list-style-type: none"> • Solid Waste Management • Water and Wastewater, • Urban Public Transport
<p>2. General criteria</p> <ul style="list-style-type: none"> • Unambiguous environment and/or climate relevance • Strong Pro-Poor relevance • Clear-cut Gender-relevance • In line with generally accepted Environment and Social Safeguard Standards
<p>3. Local/Regional Ownership</p> <ul style="list-style-type: none"> • Proposed by city/regency governments as priority initiatives • Readiness of local government to provide own resources in the project development
<p>4. Buy-in / no objection / support from respective Province</p>
<p>5. Level of alignment with national policy priorities.</p> <ul style="list-style-type: none"> • National Medium-Term Development Plan (RPJMN) • National Strategic Project (Proyek Strategis Nasional / PSN) • National SDG Action Plan
<p>6. Strategic value of idea/concept/pre-study.</p> <ul style="list-style-type: none"> • Substantial investment requirement • Potential for bundling of similar projects into lots • Potential for scaling-up • No risk of overlapping with existing commitments by other development banks/ agencies
<p>7. Level of alignment with national policy priorities.</p> <ul style="list-style-type: none"> • Financial sustainability • State guarantee for loan

And for the Resolution #4 on the selection criteria for projects, to give all participants some background: there are 7 main selection criteria for projects, first sector relevance, second general criteria, third local/ regional ownership, fourth buy-in/ no objection/ support from the respective province, fifth level of alignment with the national policy priorities, sixth strategic value of the idea/ concept/ pre-feasibility study. Last but not least, seventh we also need to align the goals of the Indonesian-German Green Infrastructure Initiative with our national policy priorities.

Dear Prof. Warning, on behalf of BMZ and the German organizations, do you agree with the proposed Selection Criteria for Projects?

Yes, we agree. The proposed Selection Criteria sounds very reasonable as guiding principles to select projects. The criteria can certainly be reviewed and revised by the Steering Committee from time to time as needed. Thank you.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Responses from Partner Provinces

Dr. (H.C.) H. Ridwan Kamil S.T., M.U.D.
Governor of West Java

We are happy and very proud to have been selected as one of the partner provinces of this Green Infrastructure Initiative. The three sectors of the Initiative, namely water and wastewater management, solid waste management, and urban transport, are exactly what West Java needs, especially in expanding metropolitan areas such as Bandung, Cirebon, and Bogor.

Your Excellency Coordinating Minister Luhut Pandjaitan,
Your Excellency Minister of National Development Planning Suharso Monoarfa,
Your Excellency Minister Müller of the Federal Republic of Germany,
Distinguished Participants, Ladies and Gentlemen.

We are happy and very proud to have been selected as one of the partner provinces of this Green Infrastructure Initiative. The three sectors of the Initiative are namely number one water and wastewater management, second is solid waste management, and third is urban transport. These three initiatives are exactly what West Java needs, especially in expanding metropolitan areas such as Bandung, Cirebon, and Bogor.

With the support of the KfW, three Feasibility Studies on Waste to Energy projects for the second phase of the Emission Reduction in the Cities, or ERiC for short, in Cirebon, Bekasi, and Bogor, have been completed. We would like to push the implementation of these projects as soon as possible.

Also, the regional transport in the Greater Bandung is our top priority because it will interconnect with the High-Speed Train that is now being built from Bandung to Jakarta. We would like to see more German technology, which is known to be reliable and durable, applied in our province of West Java. There are many other potential areas of collaboration that we can explore and develop together with GIZ and KfW.

Lastly, I would like to suggest if possible, that GIZ also assist the capacity building program of our staff both at the province and also regency level especially in the area of low carbon development knowledge.

Indeed, this Green Infrastructure Initiative offers innovative financing that we do not have yet now and we can not rely too much to our limited Provincial Expenditure Budget. Therefore, we are very happy to be selected and we gladly welcome this Initiative.

Once again, Thank you for the opportunity.
And I wish all of us to be always in good health.
Dankeschön.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Responses from Partner Provinces

H. Ganjar Pranowo, S.H., M.I.P.
Governor of Central Java

We hope that more projects can be realized in Central Java through this Green Infrastructure Initiative. The current population of Central Java is 34 million, almost half of Germany's population. With this dense population, the problems of drinking water, garbage, liquid waste, medical waste, and urban public transport are real challenges that we must all face together. We would like to learn from Germany on how to keep the Solo River clean, so that one day we can proudly call Bengawan Solo as the Rhein von Java.

Yang saya hormati Bapak Menko Marves Bapak Luhut Binsar Pandjaitan,
Yang saya hormati Bapak Menteri Bappenas Bapak Suharso Monoarfa,
His Excellency Minister Müller of the Federal Republic of Germany,
Distinguished Guests, Ladies and Gentlemen. Please allow me to speak in Bahasa Indonesia.

Kami ucapkan terimakasih atas dipilihnya provinsi kami sebagai mitra Prakarsa Infrastruktur Hijau. Baru saja bulan lalu ditandatangani kesepakatan dengan KfW untuk pembiayaan Sistem Penyediaan Air Minum Regional WOSUSOKAS, singkatan dari Wonogiri, Sukoharjo, Solo, Karanganyar, dan Sragen. Terimakasih atas dukungan KfW.

Kami berharap melalui Prakarsa Infrastruktur Hijau ini akan lebih banyak lagi proyek-proyek yang dapat direalisasikan di Jawa Tengah. Jumlah penduduk Jawa Tengah saat ini 34 juta jiwa, hampir separuh dari jumlah penduduk Jerman. Dengan populasi yang padat ini, masalah air minum, sampah, limbah cair, limbah medis dan transportasi perkotaan merupakan tantangan nyata yang harus kita hadapi bersama.

His Excellency Coordinating Minister for Maritime and Investment Affairs, Mr. Luhut Binsar Pandjaitan, His Excellency Minister of National Development Planning, Mr. Suharso Monoarfa, His Excellency Minister Müller of the Federal Republic of Germany,
Distinguished Guests, Ladies and Gentlemen. Please allow me to speak in Bahasa Indonesia

We thank you for choosing our province as a partner of the Green Infrastructure Initiative. It was just last month that an agreement was signed by KfW for financing the WOSUSOKAS Regional Drinking Water Supply System. WOSUSOKAS stands for Wonogiri, Sukoharjo, Solo, Karanganyar, and Sragen. Thank you for the support of KfW.

We hope that more projects can be realized in Central Java through this Green Infrastructure Initiative. The current population of Central Java is 34 million, almost half of Germany's population. With this dense population, the problems of drinking water, garbage, liquid waste, medical waste, and urban public transport are real challenges that we must all face together.

Responses from Partner Provinces

Terkait dengan masalah limbah, Provinsi Jawa Tengah merupakan asal dari Bengawan Solo yang bermuara di Provinsi Jawa Timur yang merupakan provinsi tetangga kami. Sepanjang aliran Bengawan Solo tumbuh berbagai industri yang mencemari sungai ini. Hal ini mengingatkan saya pada Sungai Rhein di Jerman yang pernah saya kunjungi. Kami ingin belajar dari Jerman bagaimana mengelola dan merawat Bengawan Solo dari pengalaman Jerman melestarikan Sungai Rhein, sehingga suatu kali nanti kita bisa dengan bangga menyebut Bengawan Solo sebagai *Rhein von Java*.

Ringkasnya, kami menyambut baik prakarsa ini. Kami siap bekerjasama dengan GIZ dan KfW untuk memilih dan mempersiapkan proyek-proyek pembangunan sesuai dengan skala prioritas Jawa Tengah dan sesuai dengan kriteria infrastruktur hijau.

Terimakasih dan salam sehat untuk kita semua.

On the liquid waste, Central Java must deal with this problem since it flows along Bengawan Solo river. The liquid waste disembogues in East Java Province which is our neighbor. Various industries have polluted this river. It reminds me on Rhine River in Germany that I visited earlier. Therefore, we aim to learn on preserving of Bengawan Solo River from the experience of Germany, so that one day we can proudly refer to Bengawan Solo as *Rhein von Java*.

To conclude, we would like to welcome this initiative. We are ready to work with GIZ and KfW to select and prepare development projects in line with Central Java's priority and according to green infrastructure criteria.

Thank you and stay healthy to all of us.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Responses from Partner Provinces

Dra. Hj. Khofifah Indar Parawansa, M.Si.
Governor of East Java

The three sectors that are covered by this initiative, namely drinking water and liquid waste, waste management, and urban public transport are very crucial because it addresses problem of development challenges that we face, especially in urban areas in East Java.

Yang terhormat Bapak Menko Maritim dan
Investasi Bapak Luhut Binsar Pandjaitan,
Yang terhormat Bapak Menteri BAPPENAS Bapak
Suharso Monoarfa,
*His Excellency Federal Minister Müller of the Federal
Republic of Germany*
Distinguished Guests and Observers,

Please allow me to speak in Bahasa Indonesia.

Terimakasih sudah memberikan kepercayaan
kepada Provinsi Jawa Timur sebagai mitra Prakarsa
Infrastruktur Hijau. Kami bangga dipilih sebagai
mitra.

Menyambung wacana tentang Bengawan Solo yang
disampaikan oleh Bapak Gubernur Jawa Tengah,
kami juga melihat hal ini sebagai hal yang penting
bagi Jawa Timur. Karena Jawa Timur dialiri hilir
Bengawan Solo, bukan hanya kami menampung
akumulasi pencemaran sepanjang daerah aliran
sungai, kami juga menghadapi masalah banjir
akibat luapan sungai ini. Kami berharap kemitraan
dengan Jerman ini bisa mengatasi masalah ini.

Ketiga sektor yang diusung dalam Prakarsa
ini, yaitu masalah air minum dan limbah cair,
pengelolaan sampah, dan transportasi urban sangat
tepat karena menjawab tantangan pembangunan
yang dihadapi khususnya di wilayah perkotaan di
Jawa Timur. Ada banyak kebutuhan pembangunan
di Jawa Timur di ketiga sektor ini. Salah satunya
adalah *Regional Railway Project* Tahap 1 di

His Excellency Coordinating Minister for Maritime
and Investment Affairs, Mr. Luhut Binsar Pandjaitan,
His Excellency Minister of National Development
Planning, Mr. Suharso Monoarfa,
His Excellency Minister Müller of the Federal
Republic of Germany,
Distinguished Guests, Ladies and Gentlemen.

Please allow me to speak in Bahasa Indonesia

Thank you for giving the us opportunity and
trust East Java Province as a partner for Green
Infrastructure Initiative. We are glad to be chosen
as a partner.

In connection with the previous statement of
Governor of Central Java on Bengawan Solo River,
we also perceive that this is important for East Java.
The flow of this river does not only bring pollution,
but also another problem especially flood due to
water overflow. We hope that the partnership with
Germany can solve this problem.

The three sectors that are covered by this initiative,
namely drinking water and liquid waste, waste
management, and urban public transport are
very crucial because it addresses problem of
development challenges that we face, especially
in urban areas in East Java. Many infrastructure
development projects are needed in East Java,
particularly in these three areas. One of them is the

Responses from Partner Provinces

Surabaya yang penting bagi kami. Kami berharap proyek ini bisa didukung oleh Prakarsa ini selain proyek-proyek pembangunan lainnya.

Akhir kata, kami sampaikan bahwa Jawa Timur siap bekerjasama dengan Jerman melalui GIZ dan KfW untuk melaksanakan Prakarsa Infrastruktur Hijau.

Terimakasih untuk kesempatan yang baik ini. Salam hormat dan salam sehat untuk kita semua.

first phase of Regional Railway Project in Surabaya. We hope that this project can be supported by this Initiative as well as other infrastructure projects.

Finally, we would like to convey that East Java is ready to work together with Germany through GIZ and KfW to implement the Green Infrastructure Initiative.

Thank you for this good opportunity. All the best and stay healthy to all of us.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Responses from Partner Provinces

Dr. Ir. Wayan Koster, M.M.
Governor of Bali

The concept proposed by the Green Initiative Infrastructure, which currently includes three sectors, i.e. water and wastewater management, solid waste management, and urban public transport are in line with the challenges that we are facing in Bali. One day, when you visit and enjoy the clean and green Bali, we can all proudly say that Bali becomes clean and green among others because of partnership with Germany through this Green Infrastructure Initiative. I have asked the Head of Bali Development Planning Agency to closely work with GIZ and KfW to implement this Green Infrastructure Initiative in Bali.

Yang terhormat Bapak Menko Maritim dan Investasi, Bapak Luhut Binsar Pandjaitan, Yang terhormat Bapak Menteri Perencanaan Pembangunan Nasional, Bapak Suharso Monoarfa, Bapak Menteri Federal, Dr. Gerd Müller, Bapak/Ibu Gubernur yang terhormat dan para peserta yang saya hormati pula.

Kami mengucapkan terima kasih atas dipilihnya Provinsi Bali sebagai mitra Prakarsa Infrastruktur Hijau.

Konsep yang diusung oleh Prakarsa Infrastruktur Hijau, yang saat ini meliputi tiga sektor yaitu, pengelolaan air minum dan limbah cair, pengelolaan sampah, dan transportasi urban, sangat sesuai dengan tantangan yang kami hadapi di Bali saat ini. Namun demikian, kami mengusulkan agar Prakarsa ini bisa diperluas agar mencakup energi hijau, sehingga konsep *clean and green* bisa lebih lengkap dan utuh.

Excellency Coordinating Minister of Maritime Affairs and Investment, Mr. Luhut Binsar Pandjaitan, Excellency Minister of National Development Planning, Mr. Suharso Monoarfa, Excellency Federal Minister of Economic Cooperation and Development, Dr. Gerd Müller Excellency Governors of West-, Central-, and East-Java,
Ladies and gentlemen,

Thank you for selecting Bali as one of the first partner provinces for this Green Infrastructure Initiative.

This Initiative, which currently includes three sectors, i.e. water and wastewater management, solid waste management, and urban public transport, is in line with the challenges that we are facing in Bali. However, we would like to suggest expanding this Initiative to also cover green energy, so that the concept of clean and green can be more comprehensive.

Responses from Partner Provinces

Sebagai destinasi wisata dunia, Bali dikunjungi oleh banyak wisatawan mancanegara, termasuk dari Jerman yang kurang lebih dari 200 ribu wisatawan per tahun. Kami mengundang bapak ibu sekalian untuk berkunjung ke Bali dan suatu kali ketika sedang berkunjung dan menikmati Bali yang *clean and green*, kita semua bisa dengan bangga berkata bahwa Bali menjadi clean and green antara lain karena kemitraan dengan Jerman melalui Prakarsa Infrastruktur Hijau ini.

Saya sudah minta Kepala Bappeda untuk bekerja erat dengan GIZ dan KfW untuk merealisasikan Prakarsa Infrastruktur Hijau di Bali.

Matur suksme. Terima kasih. Om shanti shanti shanti om.

As one of the world's best tourism destinations, Bali is visited by tourists from many countries including around 200.000 German tourists per year. We would like to invite all of you to visit Bali too. One day while visiting and enjoying the clean and green Bali, we can all proudly say that Bali has become clean and green partly because of the partnership with Germany through this Green Infrastructure Initiative.

I have asked the head of Bali Development Planning Agency to work closely with GIZ and KfW to implement this Green Infrastructure Initiative in Bali.

Thank you very much. Greetings and best wishes to us all.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Outlook

Prof. Dr. Claudia Warning
Director General, BMZ

Dear Ministers, Excellencies, Ladies and Gentlemen,

It is my profound pleasure to briefly outline the ambitious outlook for our bilateral Green Infrastructure Initiative for the coming months and until we meet again for the next session of the Steering Committee.

All outlined activities will be conducted in close partnership between the involved Indonesian institutions and the expertise provided by our development organizations KfW and GIZ.

The technical and financial support by Germany will be integrated in the processes and structures of the Indonesian partners so that we avoid as much as possible the establishment of any parallel project structures.

The objective is rather to provide specialized expertise, advisory services and financing to further strengthen the involved institutions and to increase the efficiency and effectiveness of the defined processes.

As you can see on the slide it is foreseen to substantially advance with two concrete investment projects to be financed via KfW, which have already been identified and prepared – one in the domain of Regional Water Management in the Province of Central Java and one in the area of Urban Public Transport in East Java.

In parallel, GIZ will support CMMAI, the involved ministries and four key partner provinces in jointly assessing and improving the various project ideas and concepts, which have already been submitted.

Once the most appropriate initiatives for future investments have been identified, the work on preparing comprehensive pre-feasibility studies

March-September 2021. Support to partner provinces in analysis of existing project proposals

March/April 2021. Appraisal of “Surabaya Regional Railway Line (Phase I)”

April 2021. Start of Implementation of “The Development of Regional Water Supply System Wosusokas”

April 2021. Inclusion of “Surabaya Regional Railway Line (Phase I)” in Green Book

April-September 2021. International procurement process for six pre-feasibility studies

April-September 2021. Preparation of Guidelines for gender-sensitive evaluation and technical criteria for environment- and/or climate-relevant infrastructure projects

can commence to allow further investments financed by KfW in the near future.

For all infrastructure projects, we will jointly apply state-of-the-art criteria for economic, environmental and social sustainability, to make sure that the desired impacts of the investments will meet the ambitious expectations of our bilateral initiative.

Thank you for your considerations.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Remarks

H.E. Dr. Arif Havas Oegrosono, S.H., M.H.
*Indonesian Ambassador
to the Federal Republic of Germany*

First, I think this shows the strong relations between Indonesia and Germany. Both countries have a very long history in bilateral relations and this event today signifies those existing excellent relationship between Indonesia and Germany. The second one, this is also a very clear example where the two countries are jointly working together addressing climate change, and with a very specific concrete project with very specific steps. The last one, this is a great example of a concrete Indo Pacific policy of Germany to Asia. And we hope your step would be followed by other European countries, or even European Union.

Thank you Bapak Luhut, Coordinating Minister of Maritime Affairs and Investment of Indonesia, Bapak Menteri Suharso Monoarfa and also Minister Müller and my colleague Professor Warning, and of course Bapak Duta Besar Peter Schoof.

First of all, let me extend my great thanks to everybody who worked so hard to get the operations up and running. And if I may take some takeaways, there are at least three takeaways from this event. First, I think this shows the strong relations between Indonesia and Germany. Both countries have a very long history in bilateral relations and this event today signifies those existing excellent relations between Indonesia and Germany. That's the first one.

The second one is also a very clear example where the two countries are jointly working together addressing climate change, and with a very specific concrete project with very specific steps. And this is very rare, I will say, because many discussions

on addressing climate change are ending up in another discussion and not exactly going into a specific financing project. So, this is again a very important aspect in addressing climate change, financing of climate change, and finding a concrete project. This is the second one.

The last one, I would say, in my view, Bapak Luhut, and Bapak Suharso and also Bapak Peter and Professor Warning, this is a great example of a concrete Indo Pacific policy of Germany to Asia. And we hope your step would be followed by other European countries or even by the European Union. For us, it is very crucial because on our side, with our independent and active foreign policy, we can actually show to the world that Indonesia is not depending on just one source of funding for investment for infrastructure but we are looking at a different sources, different partnerships, different colleagues across the globe. It is indeed a diversification of source of investments and development for Indonesia. This is a great example of German policy in our part of the world.

Remarks

And again, I would like to extend my thanks to all the political leadership at the highest level, Minister Luhut, Minister Müller, Minister Suharso, and of course, our dear governors who are here today who have worked also, as part of this major bilateral relations.

Lastly, I will follow up any other necessary actions so that this cooperation or any other new cooperation will achieve its aim most efficiently. Thank you very much. *Assalamualaikum warahmatullahi wabarakatuh.*

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Remarks

H.E. Dr. Peter Schoof
*German Ambassador
to the Republic of Indonesia*

We are not only looking at Indonesia in the sense of a conventional development assistance, but we are also looking at you as a global partner to advance our agenda for environmental protection combating climate change at the global level. I think this contribution by Germany comes at a timely moment. Indonesia faces a particular responsibility. I think of the G20 chairmanship in 2022 for the first time.

We have a general feeling that we have to address especially the issue of decarbonization and we are very happy that this is happening in Indonesia, with all of our activities that you have participated in: circular economies, waste management, public transport, making public transport greener, energy efficiency, and so on.

Thank you very much Minister Luhut and my greetings also to you and to Minister Suharso Monoarfa and to Claudia Warning representing Minister Müller and dear Governors.

I would like to just make two points. First of all, to express my joy and great gratitude that we, together with a strong partner like BMZ and all the implementing German agencies that are associated with it, are able to contribute to this giant effort that you have embarked on to open a new page in green infrastructure development in Indonesia and we are very proud and honoured to be your partner.

But as you know, we are not only looking at Indonesia in the sense of a conventional development assistance, but we are also looking

at you as a global partner to advance our agenda for environmental protection combating climate change at the global level. I think this contribution by Germany comes at a timely moment. Indonesia faces a particular responsibility. I think of the G20 chairmanship in 2022 for the first time. Of course, if you look at the statements and texts of the G20 Climate Change, environmental sustainability is at the very heart of the agenda.

We are with you when you are about to steer this important task. We are also going to see this year in November the COP 26 in Glasgow as well as the COP15 in Kunming on The Biodiversity Convention - so very important to all of us. I also think that internationally we sense a new momentum and a new climate. Of course, with a new administration in Washington, there is a

clear commitment to climate protection, and there is a clear commitment for decarbonization as well. There is a momentum in Beijing. There is a momentum in Japan, in India and of course in the European Union, as you know.

We have a general feeling that we have to address especially the issue of decarbonization, and we are very happy that this is happening in Indonesia, with all of our activities that you have participated in: circular economies, waste management, public transport, making public transport greener, energy efficiency, and so on.

Against this general geopolitical context, I see that our cooperation and our initiatives under this

Green Infrastructure Initiative partnership has particular relevance. Not only in the framework of our bilateral relations but also as an example for global partnership to advance these objectives at a global level. So, with this I would like to thank everybody, of course, Kemenko, thank you Minister Suharso Monoarfa in Bappenas, other ministries, with whom we work daily in a very good and trustful relationship.

I am proud that we can contribute something to your ambitious efforts and be assured that we, in Germany, stand at your side and you know, Minister Luhut, you always can count on the German Embassy and myself personally, if there's anything we can do. All my greetings go to you. Thank you.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Closing Remarks

Prof. Dr. Claudia Warning
Director General, BMZ

We are very captivated by your strict process and functioning coordination mechanism. That allows you to run such large initiatives. I think that for the next years our partnership we will grow even more. Minister Müller is really backing us up politically to go forward, grow and implement fast.

Dear Ladies and Gentlemen,

Minister Dr Müller had to leave just two minutes ago for the parliament. He asked me to deliver these closing remarks and to express his gratitude for the session and your cooperation.

He was very impressed by the session and the high political support which this initiative receives. Thus, he is very much interested to travel to Indonesia, to sign the MoU and to see the initiative coming alive.

We are very captivated by your strict process and functioning coordination mechanism. That allows you to run such large initiatives, to prioritize and at the same time manage your loans and debts. It gives us pride to work together with you. Within the next years, our partnership will grow even more.

Once again, best regards from Minister Dr Müller who will give his full political support as we go forward, grow and implement fast. Thank you very much from the German side.

**Virtual Kick-Off Meeting of the Steering Committee
for the Green Infrastructure Initiative**
A PARTNERSHIP BETWEEN THE REPUBLIC OF INDONESIA
AND THE FEDERAL REPUBLIC OF GERMANY

Closing Remarks

H.E. General (Ret) Luhut Binsar Pandjaitan, MPA
Coordinating Minister for Maritime Affairs and Investment

Today we have witnessed together an important milestone in the bilateral relationship between Indonesia and Germany and I believe, we can do more in the near future. And best wishes for a successful implementation of Green Infrastructure Initiative.

Ladies and Gentleman,
Prof. Dr. Claudia Warning Director General of BMZ,
Ambassador Schoof, Ambassador Havas, Dear
Ambassadors

I think the strong relationship and friendship between Indonesia and Germany is very evident in this meeting. Yes, as good friends we have many more to talk about, but time is not so friendly to us because of so limited time. But let me add a little bit that, the Government of Indonesia has a program right now what we call Mangrove Restoration for 620.000 hectares for the next four years. This year I think the target is 150.000 hectares and we kicked off this project yesterday, 1.000 hectares near Jakarta coastal line. So, this shows the seriousness of the Government of Indonesia. I think you are also aware Ladies and Gentlemen, yesterday it was also announced by one institution that success of Government Indonesia to reduce deforestation in Indonesia, I think the only country so far that is successful to do it in the past four years.

This is I think to show you the seriousness of Government Indonesia. And about the Mangrove Restoration program I gave my presentation to the World Bank in Washington DC last November and because of that there is a commitment from the World Bank to give a grant like 400 million dollars for the mangrove restoration.

Ladies and Gentlemen, I would like to conclude this meeting by thanking Minister Müller as a co-chair, my colleague Minister Suharso, Ambassadors, Governors, Excellencies, ladies and gentlemen. Today we have witnessed together an important milestone in the bilateral relationship between Indonesia and Germany and I believe, we can do more in the near future

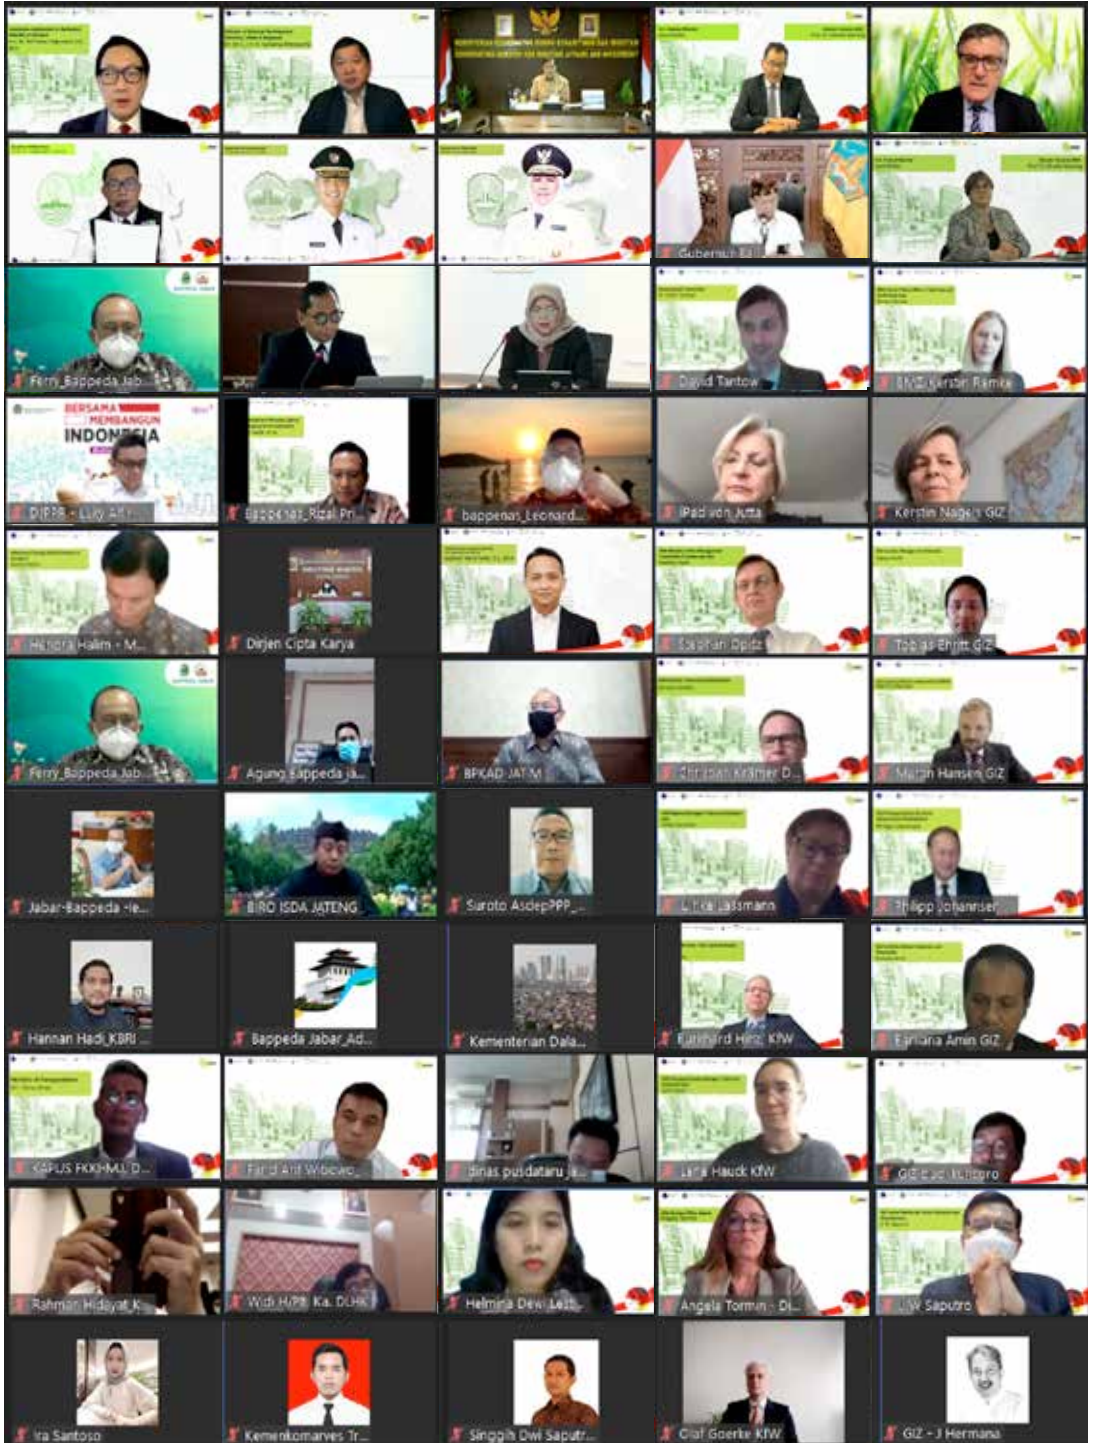

And best wishes for a successful implementation of Green Infrastructure Initiative.

Prof. Dr. Claudia Warning, I wish to see you again during the next session of G20 meeting. *Auf Wiedersehen. Dankeschön.*

H.E. Dr. Gerd Müller
Federal Minister for Economic Cooperation and Development (BMZ)
Federal Republic of Germany

Dear Excellency,

On behalf of H.E. Coordinating Minister for Maritime Affairs and Investment Luhut Binsar Pandjaitan, we would like to cordially invite you to participate in the Kick-Off Meeting of the Steering Committee for the Green Infrastructure Initiative, a partnership between the Republic of Indonesia and the Federal Republic of Germany.

The Kick-Off Meeting will be conducted ON-LINE on Thursday, March 4th, 2021 at 15:30 – 16:15 Jakarta time which corresponds to 09:30 – 10:15 Berlin time. The link to the virtual meeting room and other logistical details will be provided to the participants on March 2nd, 2021.

This inaugural meeting will be chaired by H.E. Coordinating Minister Luhut Binsar Pandjaitan and he would like to have the honor of your company to co-chair the session. The list of participants and drafts of resolutions to be presented and adopted during the meeting are attached to this letter.

We greatly appreciate the collaborative efforts from both countries in the preparation of the Green Infrastructure Initiative. This ambitious endeavor is a clear testimony of the strong bilateral relationship between Indonesia and Germany.
