

Green Competences for Green Jobs

Sample Course 3: Training Module on Green Basic Competences

A greening economy requires a workforce with adequate green skills. The participants learn what green competencies are and how these can be implemented on different levels of the TVET system. They will know how green competences can be identified, trained and assessed in adequate manner.

- **Content, elements, format and duration can be customized to the respective needs**

Learning outcomes

On completion of the training, participants

- are able to design a cross-occupational training module on green basic competences
- are able to develop relevant teaching materials
- are able to develop appropriate assessment methods

Contents

- Cross-occupational green competences in the fields of efficient use of energy and resources (incl. waste management) as well as dealing with hazardous substances
- Involving companies
- Suitable micro and macro teaching methods
- Assessment methods
- Development of lesson plans
- Development of teaching material

Formats

Virtual format learning implemented with following methods:

- E-Coaching
- One-on-one mentoring
- Individual work/ self-learning
