

Digital Teaching and Learning Fundamentals

Course 2: E-Learning in Practice

TOPICAL AREA: TVET and Digitalization

The participants will get a basic introduction on state-of-the-art digital technologies / applications for teaching and learning and how to use them. The practical-oriented training emphasises advanced collaboration and productivity suites and easy-to-use applications. It focusses on how to implement digital media in TVET teaching and learning fast and result-oriented.

- **Content, elements, format and duration can be customized to the respective needs**

LEARNING OUTCOMES

On completion of the training, participants

- understand different scenarios, formats and applications of digital teaching and learning
- use digital productivity and communication tools
- produce digital teaching and learning material
- communicate with students online
- plan, conduct and evaluate teaching-learning activities with digital media
- teach students on digital literacy

CONTENTS

- Digital media tools and applications, e.g. Google Apps, Microsoft 365 (Teams), Social Media
- ICT hardware
- Media design and production: text, presentations, images and videos
- Online communication techniques
