

The “Forestry and Climate Change in ASEAN” Project

FOR-CC is one of two modules of the ASEAN German Programme on Response to Climate Change in Agriculture and Forestry (GAP-CC) commissioned by the German Federal Ministry for Economic Cooperation and Development (BMZ) that is implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) in close cooperation with the ASEAN Secretariat (ASEC).

FOR-CC provides capacity building to improve the cooperation of ASEAN Member States on climate change-related key topics in agriculture and forestry.

FORESTRY AND CLIMATE CHANGE IN ASEAN FOR-CC

Implemented by:

In cooperation with:

Sustainable forestry and agriculture in the face of climate change in Southeast Asia

As a major producer of agricultural products and home to large forest landscapes, Southeast Asia is highly vulnerable to climate change and at the same time carries special responsibility for reducing greenhouse gas emissions from deforestation. A large share of the 600 million people in Southeast Asia relies on agriculture, fisheries and forestry for their livelihoods.

Increasingly aware of the challenges of adapting to the consequences of climate change and at the same time to mitigate the worse, the members of the Association of Southeast Asian Nations (ASEAN) have committed themselves to address the interrelated challenges of food security and climate change in the agriculture and forestry sectors. This is reflected in several ASEAN frameworks as well as the ASEAN New Vision on Food, Agriculture and Forestry (FAF) towards 2025.

How We Work

FOR-CC provides capacity building to improve the cooperation of ASEAN Member States on climate change-related key topics in agriculture and forestry. On the regional level FOR-CC promotes dialogue, exchange of knowledge, and policy development through relevant ASEAN bodies and networks, based on the strong commitment and contributions of ASEAN Member States. On the national level or in local pilot activities FOR-CC supports ASEAN Member States in implementing regional agreements as well as guidelines and to create best practices that can be shared in ASEAN. Two project components address the interrelated issue of forestry and agriculture in the face of climate change.

COMPONENTS

Cooperation on Forestry

ASEAN Member States and technical bodies have further improved the regional and national framework conditions for REDD+ and FLEGT

Reducing Emissions from Deforestation and Forest Degradation (REDD+)

Forest Law Enforcement, Governance and Trade (FLEGT)

ASEAN Regional Knowledge Network on Forests and Climate Change (ARKN-FCC)

ASEAN Regional Knowledge Network on Forest Law Enforcement and Governance (ARKN-FLEG)

Expected Output

Key Topics

Relevant ASEAN Bodies

Climate Smart Value Chains

ASEAN Member States have increased their financial and technical capacities for disseminating climate smart practices in agriculture and/or forestry value chains

Climate Smart Agriculture (CSA)
Climate Finance for Agriculture

ASEAN Climate Resilience Network (ASEAN-CRN)
ASEAN Technical Working Group on Agricultural Research and Development (ATWGARD)
ASEAN Sectoral Working Group on Crops (ASWGC)
ASEAN Working Group on Climate Change (AWGCC)
