We offer the following services for development projects in our thematic area:

1. Sustainability analyses for farms using the RISE instrument and the provision of relevant advice and training.
2. Development of concepts to promote sustainable agriculture and advisory services.
3. Technical support for sector networks in Asia, Africa and Latin America and promotion of regional technical exchange.
4. Conceptual development and (co)financing of studies.
5. Review and production of thematic papers and other publications.
6. Delivery of training on the above topics and development of new training modules upon request.
7. Organisation of events (workshops, conferences).
8. Support for national and international networking.
9. Knowledge management: analysis, comparison of best practice, and knowledge-sharing via relevant platforms.
