Service tendered:
Development of Information System RUMAH DATA KEHATI 2026

Dear Sir/Madam,

The Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH is an international cooperation enterprise for sustainable development with worldwide operations. Its corporate objective is to improve people's living conditions on a sustainable basis. GIZ has been working in Indonesia since 1975 on behalf of the German Government. GIZ supports the German government, particularly the German Federal Ministry of Economic Cooperation and Development (BMZ) in reaching its objectives in international cooperation. For further information, please visit <http://www.giz.de/indonesia>

Under the CLARITY project (WBS G-011707-001, Structure Output I-011707-99), particularly in the area of strengthening biodiversity policy management, one of the key objectives is to support the monitoring and evaluation of biodiversity management including IBSAP. In future, the Information System Rumah Data Kehati will be integrated into the BKKHI/ CHM management system.

Currently, Rumah Data Kehati Information System is not yet met as required for a biodiversity geospatial database. Therefore, further development of the system is necessary, particularly in managing the storage, visualization, administration, monitoring, and various geospatial data analyses and biodiversity mapping. This need is further reinforced by the Decree of the Minister of Environment/Head of the Environmental Control Agency Number 32 of 2026, which establishes the Guidelines for the Dissemination of Thematic Environmental Geospatial Information (IGT). These guidelines aim to regulate the orderly, consistent, and sustainable dissemination of environmental IGT, covering access authority classification, information presentation, and standard operating procedures for dissemination.

To support this activity, the GIZ will facilitate a team of consultants to strengthen the development of Information System Rumah Data Kehati.

3. Technical and Financial Assessment or Evaluation

We will evaluate the bids received in the light of both technical and price considerations. The technical proposal will be evaluated based on the criteria and weighting (Annex 2 Technical Assessment Grid).

All financial factors will be analysed and compared to ensure that the price of each item is reasonable and comparable. A financial proposal may be corrected in the following cases: inconsistencies/discrepancies, calculation errors, and unjustified additions or omissions. GIZ will inform each bidder of the changes and ask them to either accept the corrections or reject them. All corrected financial proposals rejected by the bidders will be rejected. Only the financial proposals that satisfy all the requirements at the preliminary examination stage will be qualified for the detailed financial evaluation stage.

When the technical evaluation has been completed, the financial proposal of those bidders who are eligible from the technical point of view will be opened and evaluated by the commercial officer responsible. The technical and financial proposals are weighted at a ratio of 70:30, respectively. The technical bid will be weighted with 70% and the financial proposal with 30% based on the following formula: (Technical points obtained by Bidders X divided by the best number of points) x 70 % + 30 % x (Lowest price divided by the price of Bidders X).

$$\frac{\text{Technical evaluation of bid} \times 70\%}{\text{Technical evaluation of the best bid}} + \frac{\text{most economical bid} \times 30\%}{\text{price of the bid}}$$

An overall order of rank is thus established, with the most cost-effective bid at the top.

If necessary, GIZ has the right to invite bidders for a presentation proposal as it is part of the technical evaluation process.

4. Validity of Proposals

Proposals should be valid for a period of not less than 100 days after proposal opening, unless otherwise specified in the specific terms and conditions. Bidders are requested to indicate the validity period of their proposal.
