

EXPRESSION OF INTEREST

REQUEST FOR EXPRESSION OF INTEREST FOR GOOD
AGRONOMIC PRACTICES FOR THE ALMOND FARMERS UNDER
THE AGREE PROJECT WITH TALMOND

CONSULTANCY FIRMS REQUIRED

BACKGROUND AND OBJECTIVES

The Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH is a provider of international cooperation services for sustainable development and international education work, dedicated to building a future worth living around the world. As part of the Ghana-German cooperation, GIZ has been involved in supporting a wide range of sectors for over 30 years. As agreed between the Governments of Germany and Ghana, GIZ is boosting Ghana’s potential by focusing its projects on three priority areas: Responsibility for our planet - climate and energy, Training and sustainable growth for decent jobs as well as Peaceful and inclusive societies. In addition, nearly all the projects in Ghana involve the private sector.

GIZ has been commissioned by the German Federal Ministry for Economic Cooperation and Development (BMZ) to implement the Special Initiative on Training and Job Creation, which operates under the brand ‘Invest for Jobs’. The objective is to promote job-creation and growth of enterprises in Ghana. Invest for Jobs works in three areas of intervention: ‘Business & Invest’, ‘Cluster approach’ and ‘Ghanaian SME (Mittelstand)’. Under the ‘Business & Invest’, it promotes sustainable investments from German and European companies and investors; the ‘Cluster approach’ aims to increase the economic attractiveness of business locations and industries; intervenes to support industrial parks, improves export opportunities and addresses various obstacles to investment. The ‘Ghanaian SME (Mittelstand)’ promotes the SME sector, by improving the business environment and enhancing competitiveness, by promoting advisory and (innovative) financial services for SME and boosting cooperation between German and African companies.

Under its first component, Business and Invest, The Almonds for Green Regenerative Employment and Ecosystems project is under implementation. **Almonds for Green Regenerative Employment and Ecosystems**

The kernels of the tropical almond can be processed into useful food products to enhance food and nutrition security especially in developing countries. The products can also be traded to generate income. Integration of tropical almond into production systems especially in rural areas could help improve livelihoods of farmers, women and children. Despite the importance of tropical almond in relation to nutrition, good health, income and job creation and enhancement of general livelihood especially of the rural poor, the crop is neglected or regarded as an orphan crop or minor crop in Ghana. No plantations exist with majority of trees spatially distributed in the backyard of households. No improved variety is commercially available. Talmond established 23 elite varieties in the field which it is providing to tropical almond growers under its Tropical Almond Agroforestry Program.

SCOPE OF THE ASSIGNMENT

GIZ Ghana seeks to engage a well-established company with the requisite skills and capacity to undertake this assignment that includes providing GAP trainings for selected farmers in the Volta Region of Ghana.

As part of the process to also improve yields on the farm, the firm is to undertake a training for all the identified farmers, in Good Agronomic Practices peculiar to the Almond industry. The firm would work in collaboration with the Talmond Ghana, to identify and train the farmers.

Area of Assignment: Ashanti Region

Duration: This specific assignment is expected to take place within 6 months.

The contractor is responsible for providing the following services:

The objective is to:

- 1. Review/adapt manuals and curriculum on Good Agronomic Practices from relevant organizations to context of the project for the identified groups.
- 2. Sensitize 300 beneficiaries and support them to adopt the practices as shall be delivered in the GAP trainings as designed.

EXPERIENCE AND QUALIFICATION OF THE CONSULTANCY FIRM

The firm should have relevant professional experience in the subject area and proof of similar assignments. Key requirements include:

- Strong project management capabilities, including planning, coordinating, and monitoring project activities, and mobilisation and selection of target groups.
- Ability and experience implementing structural and wastewater systems.
- Proven experience in diagnosing a faulty water system and providing remediation measures.

The team should have the following qualifications:

- Education/training (2.1.1): (Master’s) degree in Business Administration, Social Science, Marketing, Development management or related fields.
- Language (2.1.2): Good business language skills in report writing and communication skills in English and good knowledge of local languages (Twi, Fante, Bono etc.)
- General professional experience (2.1.3): At least 12 years’ experience in community work and enterprise development or any group activities.

Language: Fluent in English language

Interested consultancy firms with proven experience in this area of work are kindly requested to express their interest for the above-mentioned project.
