

Information For Health Providers At Evaluation Centres

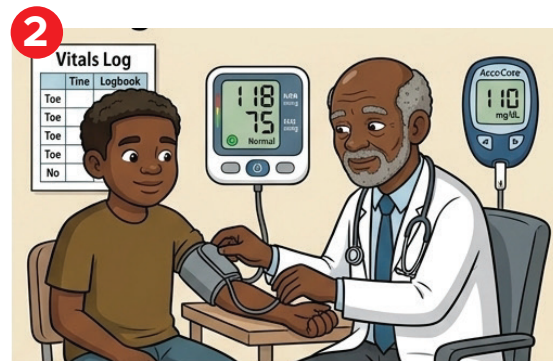

Hypertension and Diabetes Management

Following community screening, patients found to have elevated blood pressure or blood glucose will be referred to their designated health centre for care and will have follow-up appointments scheduled according to the agreed clinical management plan.

Patient Journey Through the Health Centre

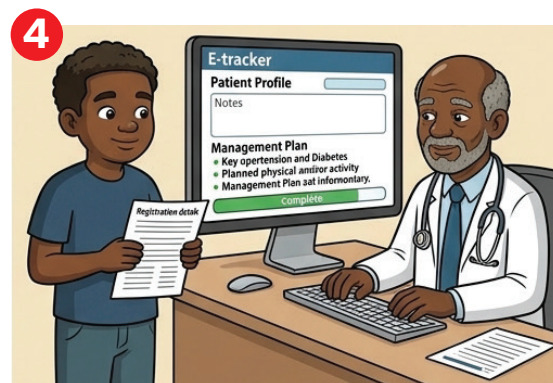

1 Receive patients and complete new patient registration by entering their details into the E-tracker.

2 Confirmation of diagnosis. Vitals Check & Initial Consultation for confirmation of diagnosis

3 Management, Counselling & Patients' Education

4 Complete remaining Patient Information Entry on E tracker
