

Wewe! Wewe Ltinga. Hizi tamaduni zimepitwa na wakati! Mke wangu alikwenda kule na kuweza kujifungua mtoto mwenye afya njema. Mpeleke mke wako hospitali ili apate matibabu.

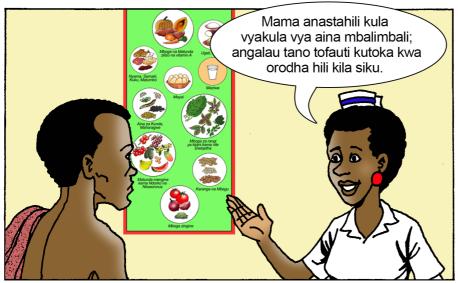

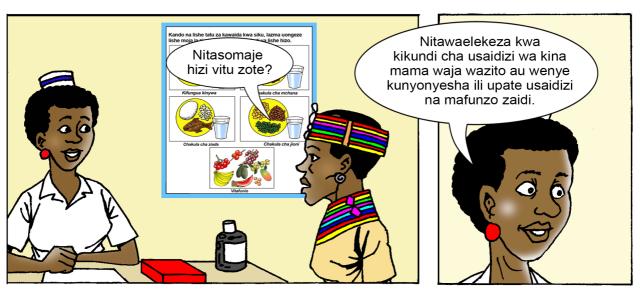

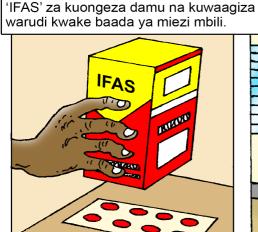

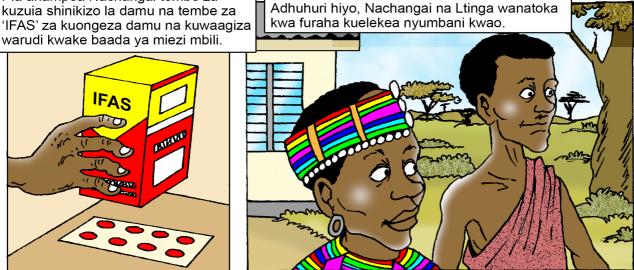

Mhudumu anawapatia neti za mbu. Wewe na familia yako lazima nyinyi nyote mlale ndani ya neti za mbu zilizotibiwa ili kuepukana na ugonjwa wa malaria.

Nilitumwa kwako na Muuguzi Joyce kutoka kituo cha afya cha Korr ambaye alinieleza kuhusu hiki kikundi kinachosaidia

Siku inayofuata Nachangai anatembelea mwenyekiti

wa kikundi hiki cha kusaidia kina mama.

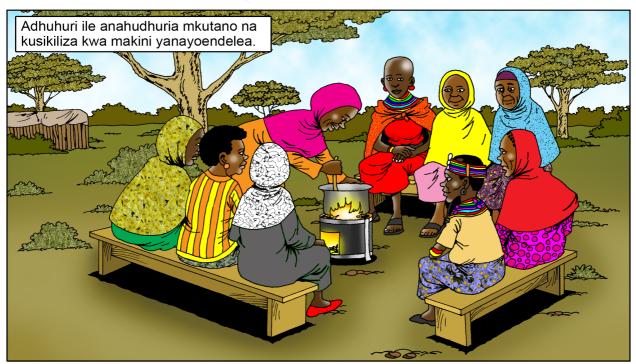

Ndio, namjua Muuguzi Joyce. Amekuwa rafiki wa kina mama wengi walio katika kikundi.

Haya, nieleze kuhusu hiki kikundi. Mnafanya nini? Tuna shughuli nyingi, tunasaidiana wakati wa uja-uzito na pia wakati wa kunyonyesha watoto. Tuna mkutano leo adhuhuri na unaweza kujiunga nasi ili ujue mengine mengi.

Nachangai anaandamana na Lelo mpaka kwa shamba lake la jikoni alikokuza viazi vitamu, mboga tofauti kama vile terere, tikitimaji na mbaazi. Anafurahi kwa yale anayoyaona.

Baada ya siku chache, Lelo na washirika wengine katika kikundi wanamsaidia Nachangai kuanzisha kijishamba kidogo cha jikoni. Wanapanda viazi vitamu, mbaazi na mchicha.

Nachangai anarutubisha lishe ya familia yake kwa mboga za kienyeji na matunda. Anakula matunda mwitu pia. Amejifunza jinsi ya kuchagua vyakula vilivyo na virutubisho (nutrients) kama mboga zenye matawi makubwa ya kijani kibichi

Maternal Nutrition

A heavily pregnant Nachangai struggles with medical complications that accompany her pregnancy. When the worst comes to the worst, no other choice is left but taking her to the hospital. She receives maternal nutrition education that challenges her to change her lifestyle to get better outcomes with this pregnancy. Will she manage to do it?
